# KnifeLight

## Carpal Tunnel Release

Shedding new light on CTRL

# KnifeLight

## Carpal Tunnel Release

### Indication

The Stryker Knifelight is a manual surgical instrument used for the release of the carpal tunnel ligament. It features an integrated light source to illuminate the surgical site which allows for a minimally open technique with minimal disturbance of surrounding tissue.

- Minimally open, non-endoscopic, approach to Carpal Tunnel Ligament Release
- 2cm incision allows visualization of the distal third of the transverse ligament
- Illuminates ligament and surrounding landmarks
- Cutting blade is isolated from the surrounding anatomy to help avoid unintentional damage
- Smooth tip protects nerves

### Tip Dimensions

### KnifeLight

- Can be performed in the O.R., surgery center, or office under local anaesthesia
- Suitable for most CTRL procedural techniques
- No capital equipment required
- Packaged sterile as a single use instrument
